A Comprehensive Strike Scheme. The national officers of the Knights of Labor have a scheme to set on foot a strike that will be of more interest than anything of the kind that has been seen.

They are at the pains to explain what they mean by this. They would have labor, skilled and unskilled, of whatever kind, take a rest until the coal strike is settled to the satisfaction of the miners.

There is no longer occasion to take anything at second-hand. First hands are eager to serve the committee and the public with materials of the first order to confirm all that has been charged against the police machine and to establish more than has been dreamed of.

AN INTELLIGENCER correspondent writing from Sutton gives an entertaining snap-shot of Democratic politics in the Democratic county of Braxton. It seems that there is a good deal of Camden and anti-Camden politics in West Virginia this year.

Republican League Convention. There is promise of a large gathering at Fairmont on the occasion of the Republican League convention. The Baltimore and Ohio, the Ohio River and the West Virginia & Pittsburgh have made one rate for the round trip, and other railroads have given reduced rates.

The Intelligencer's advice from over the state foreshadow a large attendance of active earnest men. There is to be no state nominating convention this year, and the faithful are disposed to avail themselves of this agreeable opportunity to come together for counsel.

West Virginia Republicans have some business on hand in this year of grace. The brethren need not fear that Fairmont will not take good care of those who attend the Republican League convention next week. Fairmont will do the handsome thing. There is more of that mountain city than there used to be.

The Cost of It. The effort to preserve the peace in the disturbed counties of Belmont, Guernsey and Tuscawawas is costing the state of Ohio \$16,000 a day at a low estimate. At this rate it is easy to figure how long it will be before the cost will run up to \$200,000. Every dollar of this must come out of the pockets of the people. In the end labor will pay all of it.

In West Virginia the cost will be less because fewer troops are in the field, but the money must come from a like source and in this state there are fewer people to bear the burden. Add this to the direct loss occasioned by the strike—a loss never to be recovered—and we have an aggregate of cost that is staggering. Some strikes may be thought to pay, but lawlessness never pays.

The further the probe goes the more defects it shows in the Carnegie armor plates. It shows also some defects in the naval inquiry. The whole thing is almost beyond belief. The people will not be satisfied until the probe shall have been driven to the bottom. This may save some of our new war ships from going to the bottom.

BREAKFAST BUDGET. A duck fell into a well on the place of Frank Whitehead, at Scotland Neck, North Carolina, eight months ago, and when removed the other day was found to be in a perfectly healthy condition. Inks are made principally in blacks and reds, but they are also made in a great variety of colors, and a considerable quantity of white ink is sold, for writing on black cards.

The finance committee of Philadelphia councils has recommended an appropriation of \$10,000 to make a survey of a ship canal from Philadelphia to the ocean. In France 148,808 families have claimed exemption from certain taxes recently voted by the government, on account of having seven or more children.

The world's oyster fisheries produce annually 4,380,000,000 of the succulent bivalves, one-half being consumed within three days after they are taken. A man may float in salt water, without moving his hands or feet, if he have the presence of mind to throw his head

Judge Taft's court in Ohio would be given to Judge God's court in West Virginia.

The whole power of the national government is back of all its courts. This being true, the rioters should see how vain will be all the stand they may make against the orders of Judges Taft and God. Those orders must be respected and obeyed. For failing to appreciate this, one West Virginian is now in jail serving out a sentence of sixty days.

The Intelligencer hopes that there may be no occasion to punish anybody else for this offense and urges the men on both sides of the river to yield a ready obedience to the law, which is stronger than all who may arrayed against it.

If France has stolen a march on England in Morocco the lion should not roar and lash his mighty tail. He has stolen some marches himself. Thus far France has not been accused of poisoning the late sultan.

A Developing Field of Investigation. When the Lexow committee of the New York legislature began its investigation of the corrupt practices of the police force of the metropolitan city, people who knew things closed their mouths and ducked their heads lest they might be called to testify. The police force had such sway that people were afraid of it. With the will and the power to take reprisals, it was feared that the corrupt public servants would pursue to the end anybody who gave testimony against them.

It is high testimony to the bearing of the committee that it has been able to command the public confidence and to relieve the people of the duress of fear under which the intimidating tactics of the police had placed them. Men and women are coming forward in large numbers to offer such testimony as the committee never hoped to get. Now that it seems to be safe to testify, because the power for evil is already broken by the exposures, the committee may have all the testimony it wants to show the workings of the Tammany blue-coated adjunct.

There is no longer occasion to take anything at second-hand. First hands are eager to serve the committee and the public with materials of the first order to confirm all that has been charged against the police machine and to establish more than has been dreamed of. Thus for the committee has done well, but it has only fairly begun. Day by day it is knocking away Tammany's underpinning.

There is more catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer \$100 for any case it fails to cure. Send for circulars and testimonials. Address: F. J. CHENEY & CO., Toledo, O.
